

CREATION

4-part series

Sunday's in February 2012
at New Life Sanctuary

Speaker: John Feakes

John Feakes is the team leader of C.A.R.E Ministries Winnipeg (Christian Apologetics Research & Evangelism) which he founded in 2002. A lecturer and conference speaker, John has taught college courses in Apologetics, World Religions and Counter-Cult Studies.

Part One – Creation: Why and How

This message explains why the Genesis account of creation is foundational to the Christian faith. We will also look at why it must be defended against Darwinian attack and how our study will proceed in the messages following.

Part Two – The Nature of the Genesis Record

This message explains why the Genesis account of creation ought to be understood as a factual, historical narrative. Allegorizing the text will be shown to be both needless and fruitless.

Part Three – Christ the Creator

The “hard to believe” aspects of the Genesis account suddenly become more believable when we consider Christ the Creator, and what He accomplished during His earthly ministry. Our Lord’s activities as described by the apostle John are considered in this message.

Part Four – Science & Creation

Despite popular claims to the contrary, scientific study actually flows out of a trust in the biblical record. In no way can the Christian faith be described as anti-science. Christianity will be shown to be a faith that fits the facts.
